Customer requirement

Reducing the overall system costs has a determining influence on the success of a rail traffic enterprise. With the procurement of new rolling stock or the modernization of vehicles the points are set for an efficient revenue service. A chal-

Design study for interior design of a metro vehicle

lenge consists in meeting the right procurement decision by means of functional specifications and systematic evaluation.

Tools for evaluating offers technically and commercially

Realisation

PROSE disposes of experts with experience and a vast knowledge with regard to the latest status of the relevant standards. PROSE elaborates the vehicle concepts according to the requirements of the operator and prepares the respective technical specifications. PROSE is in the position to manage the tendering process and to carry out a systematic and comprehensible evaluation after submission of the offers as well as to deliver recommendations for the procurement.

PROSE played a decisive role during the conception and the acquisition of the light transit system in Hong Kong

Customer Advantage

The assignment of PROSE experts creates the following benefits for the customer:

- relief of own resources
- reduction the project duration
- contribution of external, state of the art know-how
- critical assessment of the internal organisation and processes
- neutral and uncommitted evaluation of the offers
